INTRODUCTION

From a small family workshop to an international group:

Over a century of working to provide power, voice, data, multimedia and lighting solutions in all types of spaces.

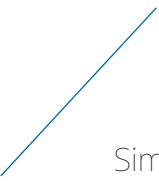

We've been connecting with millions of spaces and uniting people for over 100 years.

Simon Group.

Showroom La Casa de la Luz, Madrid

Showroom La Casa de la Llum, Barcelona

Simon is 3,800 people all over the world. We operate in over 90 countries, with industrial capacity in nine of them — we have 11 factories and a team of 2,163 people dedicated to production.

We adapt to the needs of each market, adjusting the design and functionalities users' needs across different regions. By doing so we create jobs, boost the local economy and add value from close to home.

Global coverage.

Customised attention in architectural and interior design projects, refurbishment and new construction.

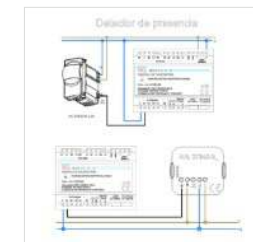

We collaborate with the professionals across every stage of the process — design, installation, commissioning and maintenance.

Simon Tools:
Product configurators, lighting software, BIM files, installation drawings and tutorials.

We're at your side,
from start to finish.

CONFIGURATORS

INSTALLATION
DIAGRAMS

VIDEO TUTORIALS

We don't just come up with ideas — we also design, manufacture and certify them.

We seek solutions that improve the way spaces are designed, built and lived in. Wherever they go, Simon's designs gain international recognition.

Practical, sustainable and visionary designs. We reinvest 6% of our turnover in R&D. We have over 250 patents to our name, as well as several international awards.

Design and industrialisation

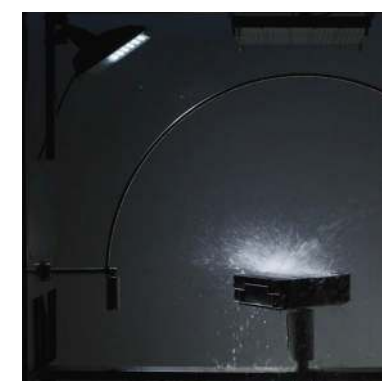

We have our own laboratories for testing our products to the highest European standards.

We test, guarantee and certify without leaving the house.

Thanks to our state-of-the-art technology, we can conduct exhaustive quality and safety controls.

- Photometric tunnel
- Electromagnetic compatibility
- Strength of materials

Innovation: Simon LAB.

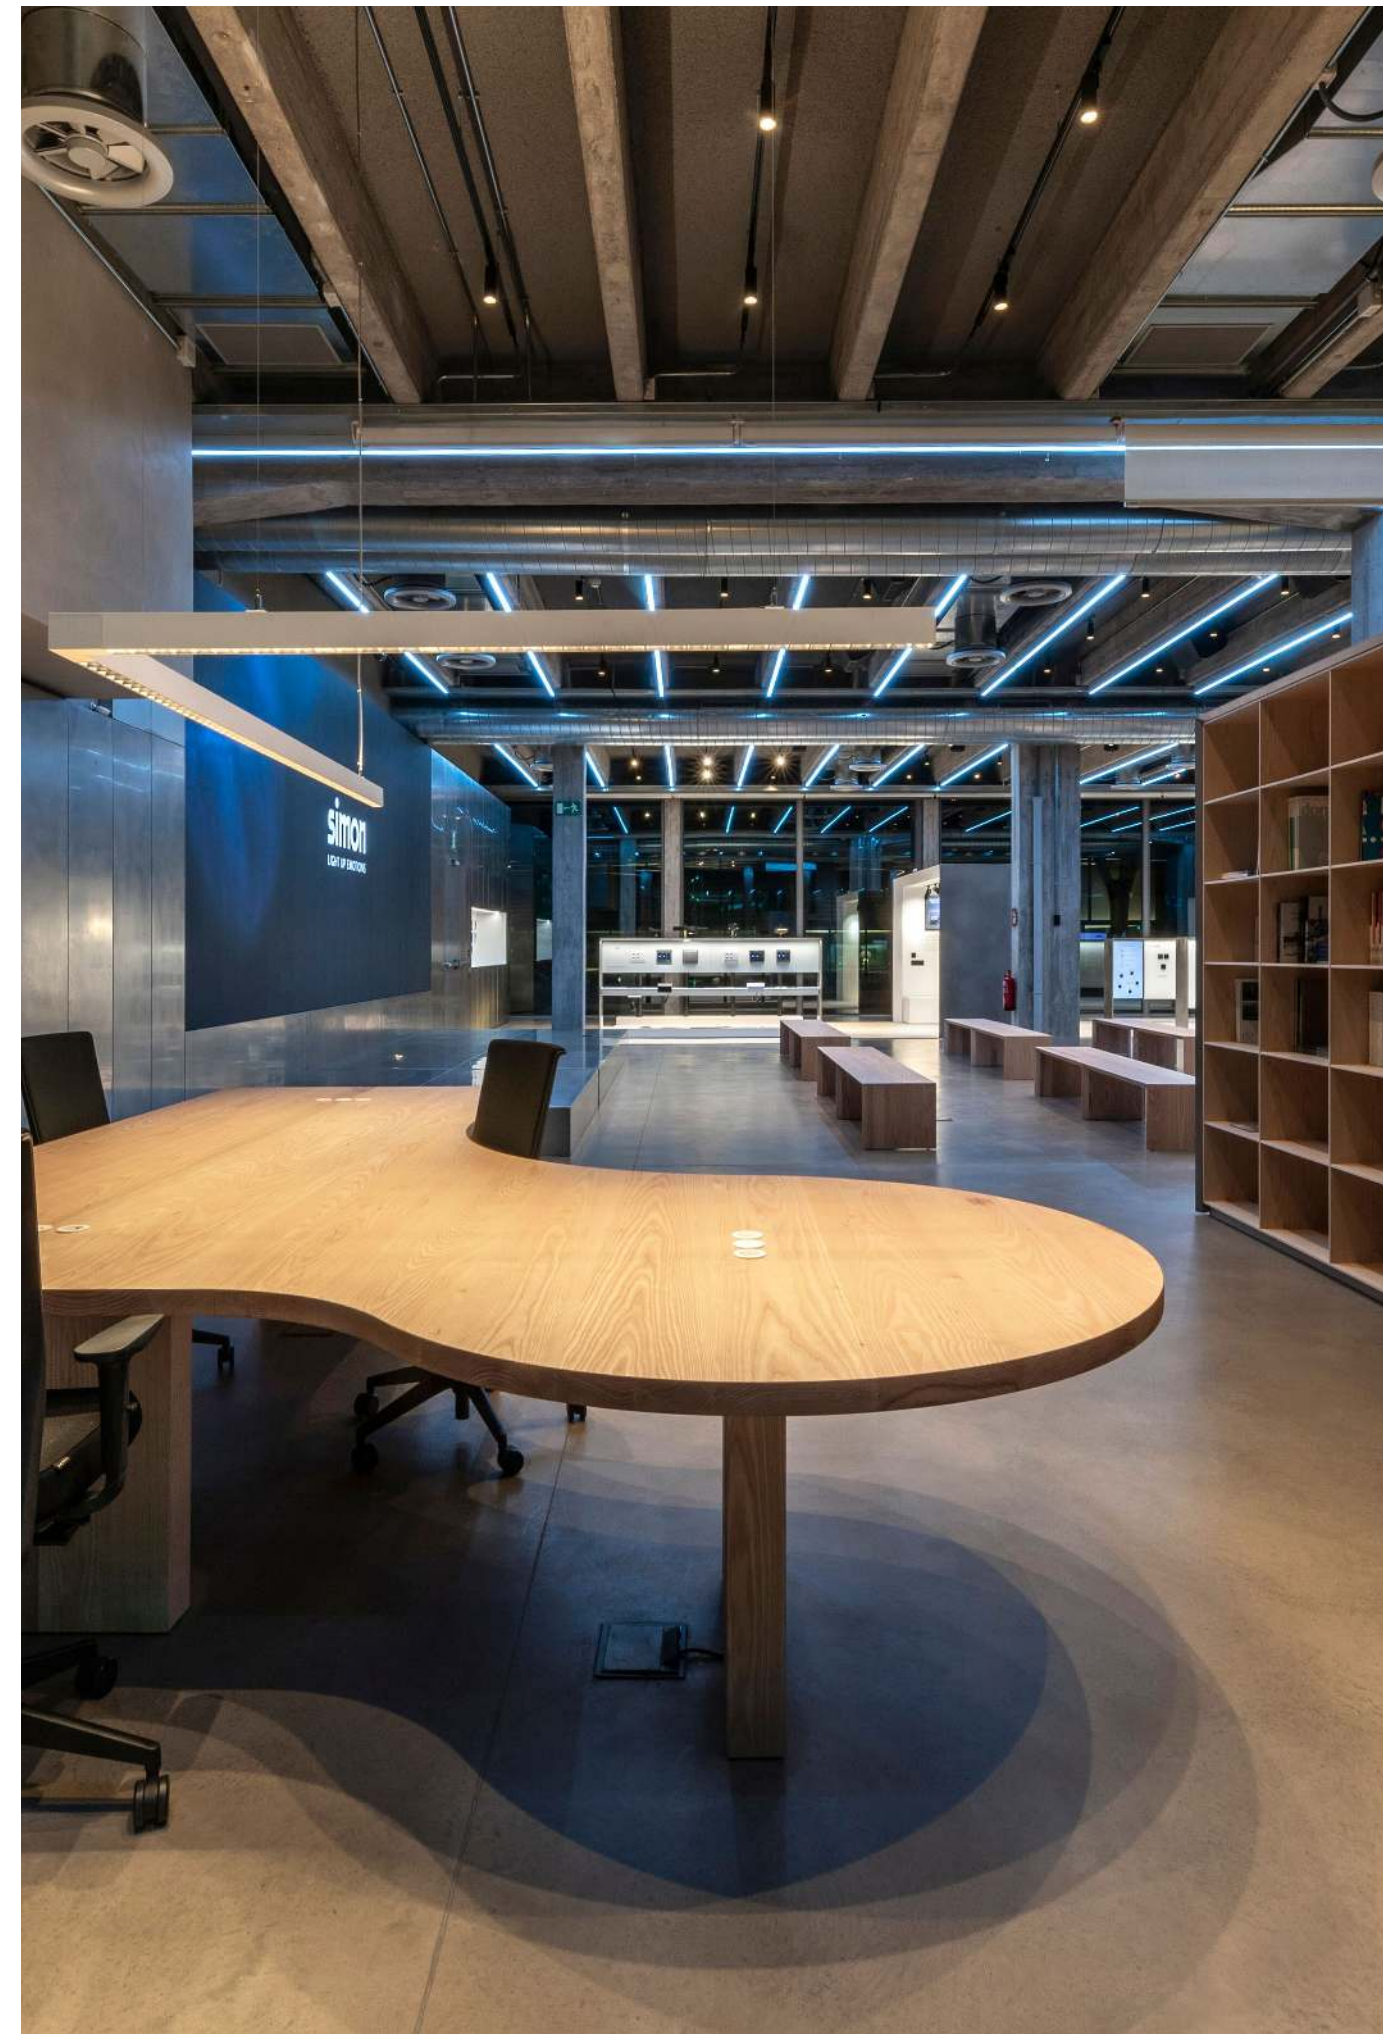

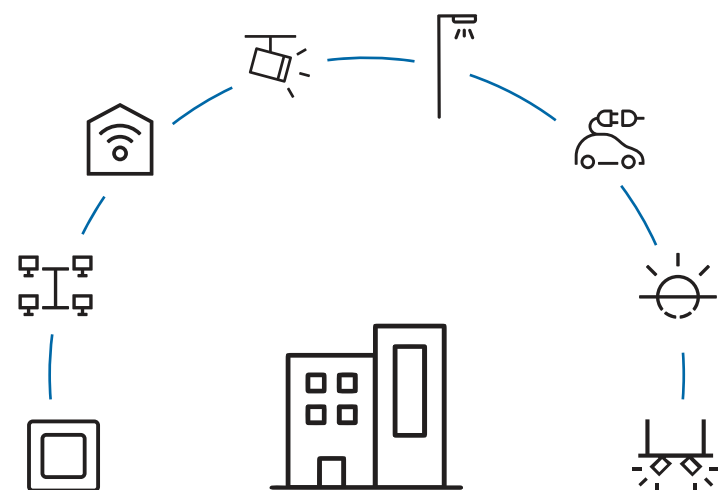

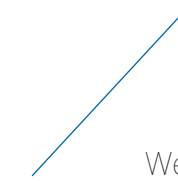

All the technological solutions you need for your projects

Our solutions humanise technology and integrate with architecture to create unique spaces adapted to people's needs.

Solutions to create intelligent, flexible and efficient buildings adapted to their various functions, contributing to the architecture and design in all types of spaces.

Integral projects.

We have our own production centres. This allows us to be at the heart of the process and adapt quickly our clients' needs. We've transformed the industrial model to offer more agility, greater customisation capacity and the highest standards of quality and service.

Productive centres.

WORKSPACES

Conceived for well-being

Flexibility

Architectural integration

Customisation

Decorative styles

Improving the user experience

Solutions for any eventuality

Our highest value is creating connected spaces.
Our solutions allow you to create multi-purpose and flexible spaces, adapted to each user and moment, where the functions you need are perfectly integrated into the interior design.

Conceived for
well-being.

Flexibility and well-being

Flexible environments that offer wellbeing, comfort and freedom for users to arrive and connect wherever they want and work individually or collaboratively.

Architectural integration

Because we understand connections as an intrinsic component of the space, they integrate seamlessly into furniture, floor, wall, ceiling and building elements.

Customisation

A specific customisation for each project. We adapt to the needs of each design, configuring the desired functions to measure.

With configured products and kits — pre-assembled and wired to speed up ordering, composition and installation.

Decorative styles

Connections that are part of interior design. Various decorative possibilities and finishes to discover concepts that harmonise with the desired appearance and atmosphere.

We really are good at connections.

The electrification solution will depend on the specific user's needs and the type of furniture.

Connectivity needs to be adapted to the type of space — individual or collective — and the activity.

Improving the user experience

Adapted functions

Multiple customisable functions, including state-of-the-art USB charger range.

Universal solutions

Electrical solutions adapted to various countries via a wide range of international sockets.

Compatibility

High-speed voice and data, compatible with the most common connectors.

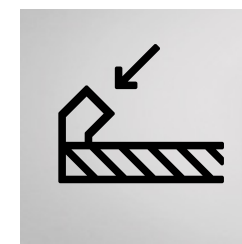

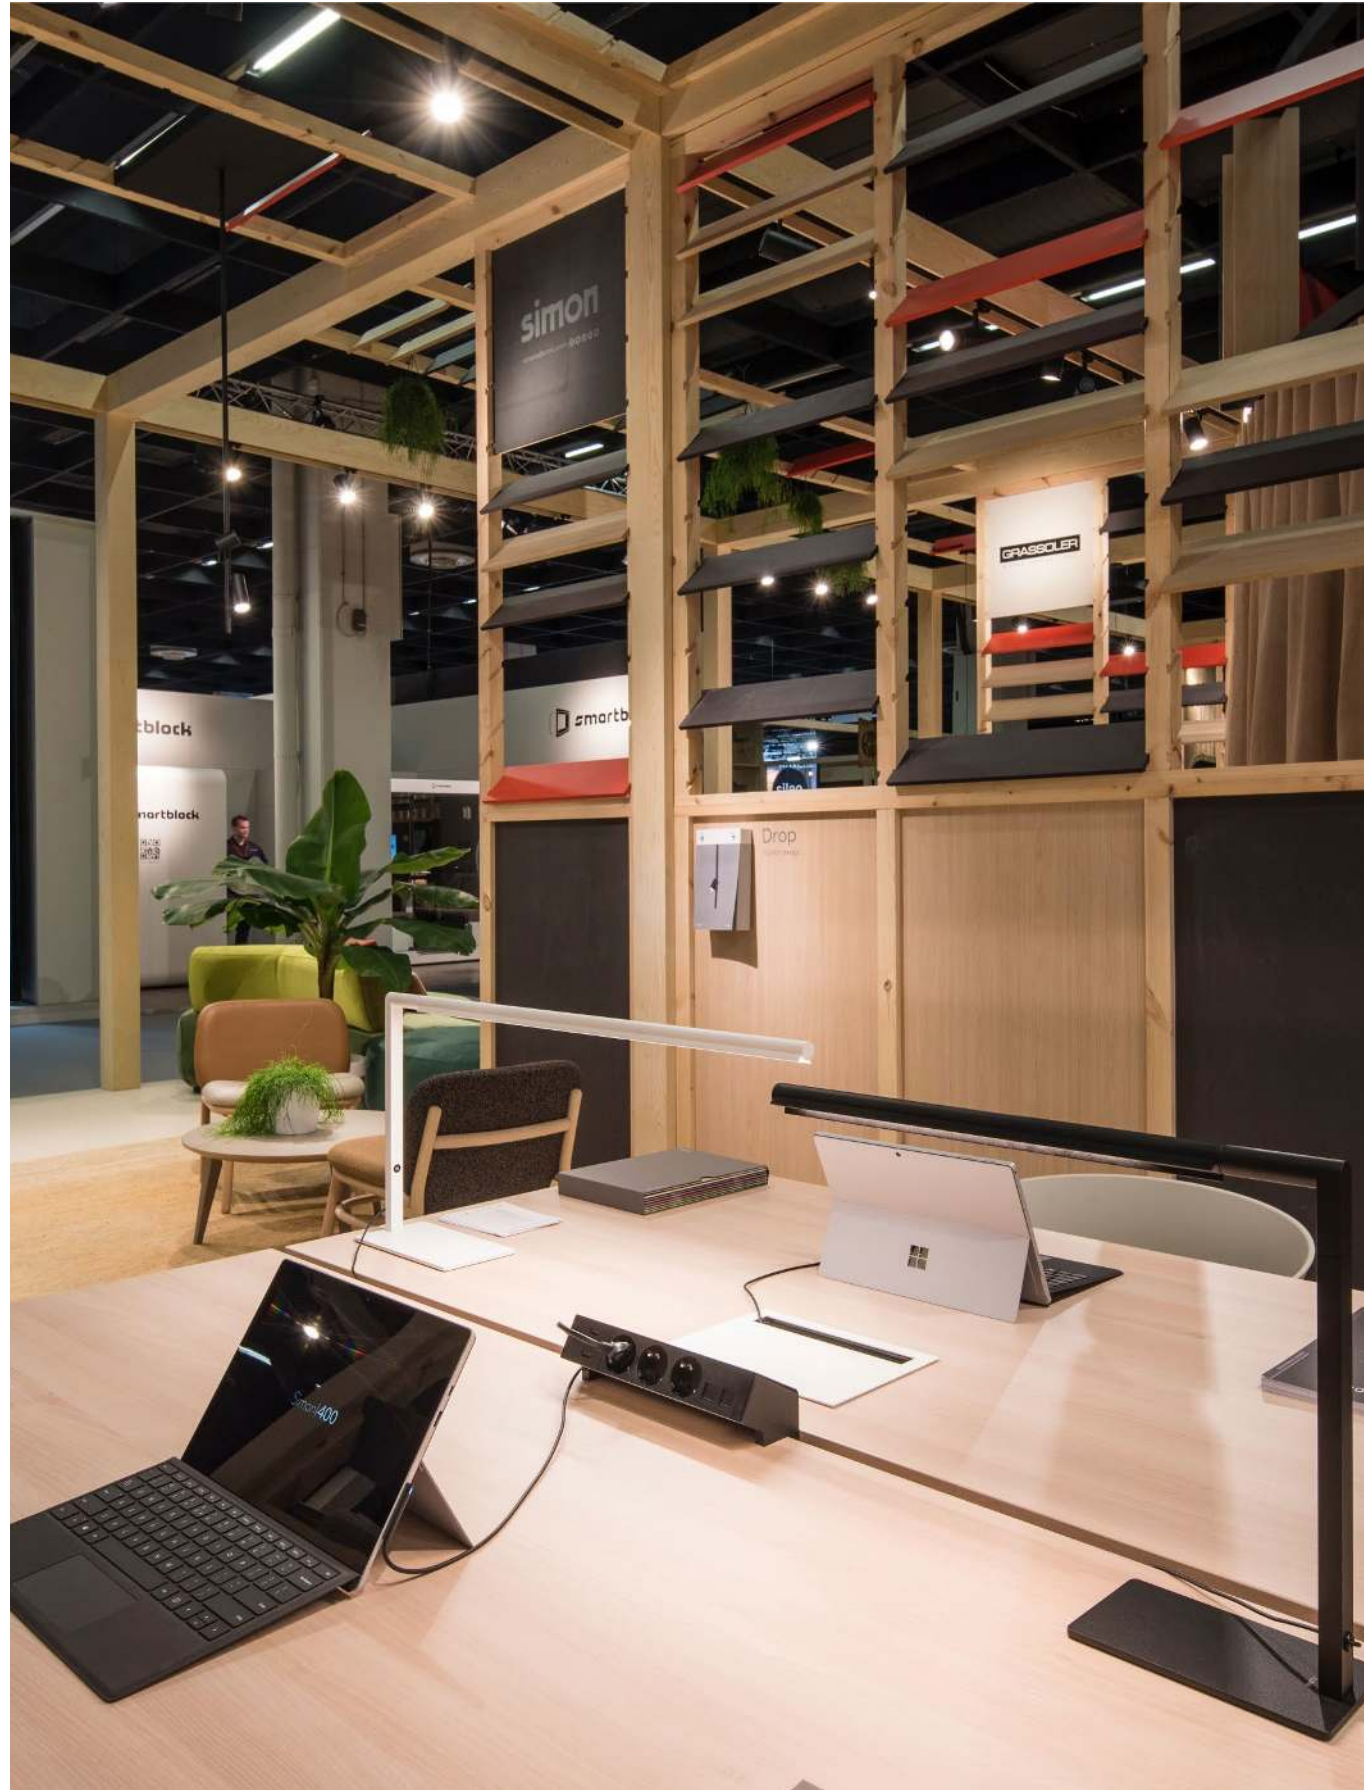

Convergence of power, USB charging, protection elements, voice, data and multimedia solutions in any type of furniture, floor, wall and ceiling installation.

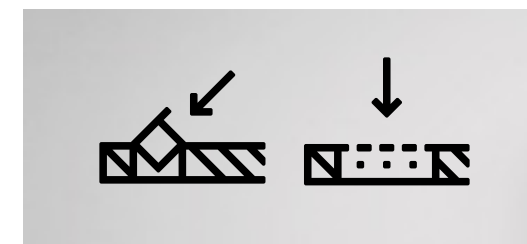

Carefully designed, high-quality enclosures prepared for daily use in spaces with large personnel flow.

Solutions for any
eventuality.

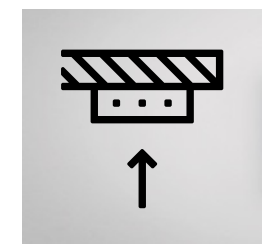

Over the furniture

With attractive and simple lines thanks to its small size, it offers all the connectivity resources from any point, so employees have everything on their desks they need to feel happy at work.

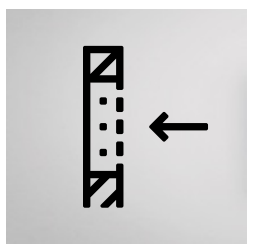

In the furniture

Solutions to free up space on desks, allowing users to organise their desks to their specific requirements. The cover conceals all connectivity, so the wiring is barely visible — you only see it when you want to see it.

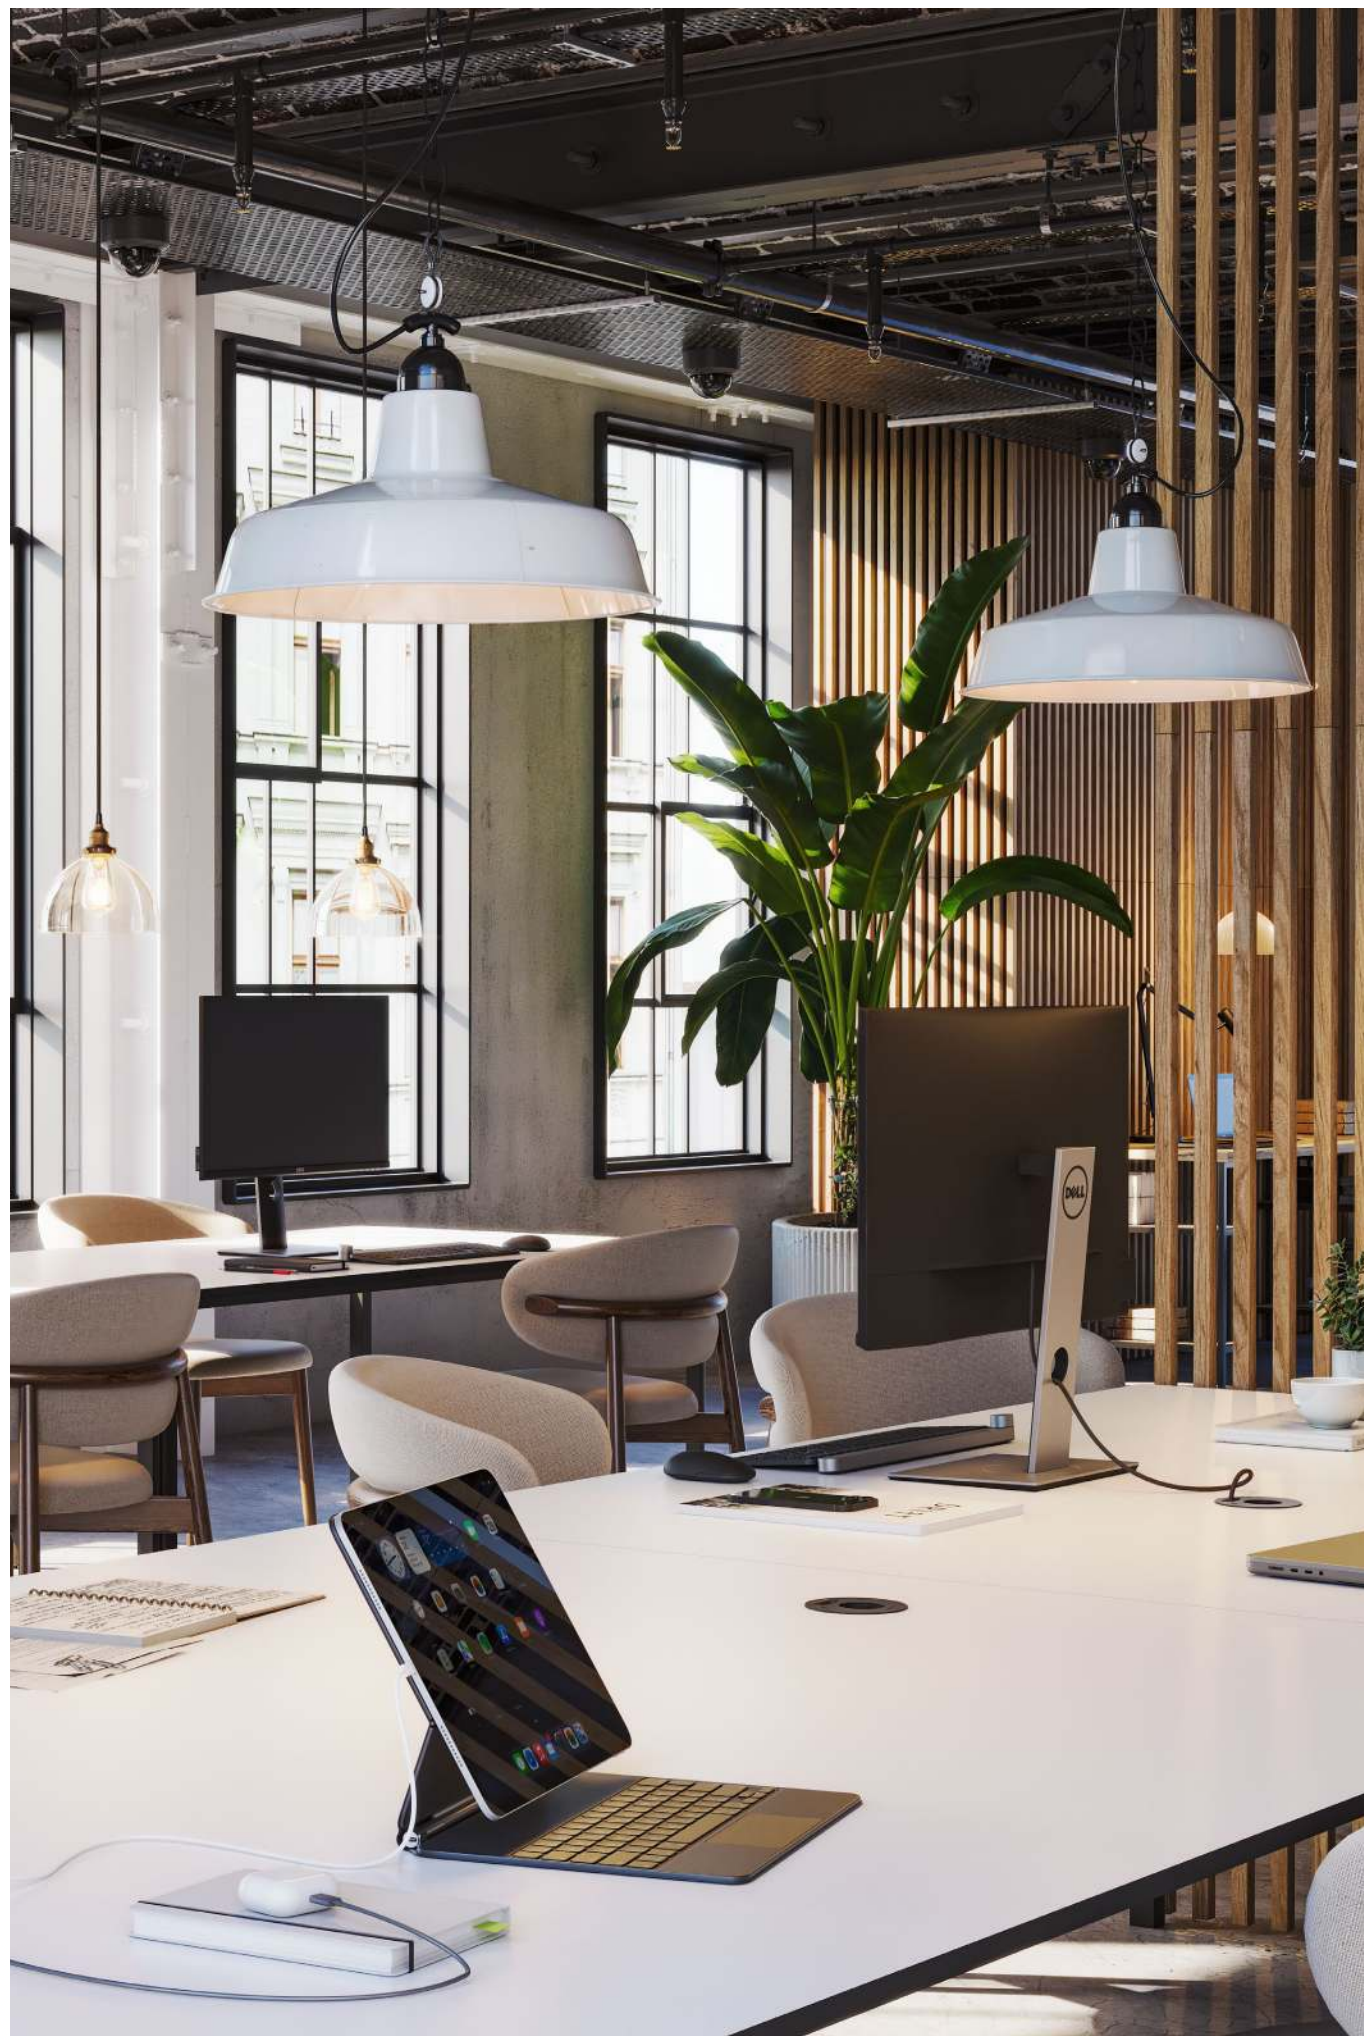

Under the furniture

Designed for accessible yet discreet connectivity, offering integration into furniture with minimal encroachment.

Auxiliary furniture

For electrifying any type of furniture and turning a space into a place where you can work, concentrate, carry out tasks or have power connection points for any purpose.

ELECTRICAL SOLUTIONS FOR FURNITURE

Over-the-furniture solutions

In-the-furniture solutions

Under-the-furniture solutions

Auxiliary furniture solutions

Installation accessories

Flexible connection system

Attractive and simple, these solutions facilitate the use of socket outlets, **RJ45** voice and data connectors, **USB chargers** and **multimedia connectors**.

OVER THE FURNITURE

Simon K45 Ofiblock Plus boasts modular composition system which allows you to customise the configuration. It has accessories for integration over the furniture without the need for machines.

Simon 400 Top is integrated over the furniture, to take up as little space as possible and maximise the useful work area, meaning employees have everything on their desks they need to feel happy at work.

Simon 400 InDesk

The in-the-furniture solutions fully integrate into the furniture, reducing the number of visible lines and offering perfect ergonomics and practicality.

By eliminating unusable spaces, our designs take up as little space as possible in the furniture, reducing the size by up to 23% and optimising the usable work area.

Simon 400 Flash 90 Working to transform workspaces, we've incorporated connectivity options for workstations in open spaces, extending the collection to electrify auxiliary furniture and soft seating.

Simon 400 InDesk Duo Specific version with double access to facilitate use from either side of the table. ideal for meeting rooms, it features a metal cable outlet to harmonise with the desk's design.

Simon 400 Flash 60 Compact designs that take up minimum space on the desk and optimise the useful work area, for greater freedom of movement while working.

Simon K45 Ofiblock Line Solution for in-the-furniture installation in matt brushed stainless steel finish with direct access to the connectivity required in the workspace.

Simon K45 Teleblock with automatic lifting in aluminium finish to blend into any environment. Users can lower the profile with the wiring connected.

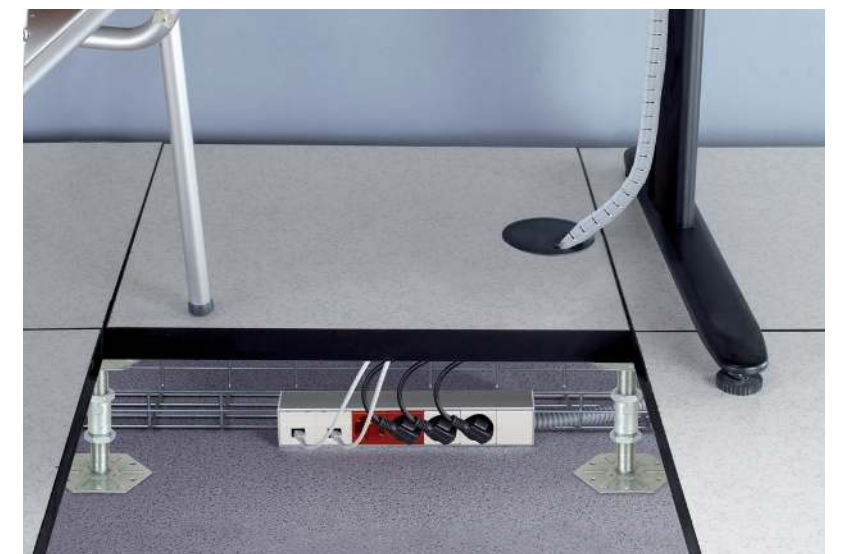

IN THE FURNITURE

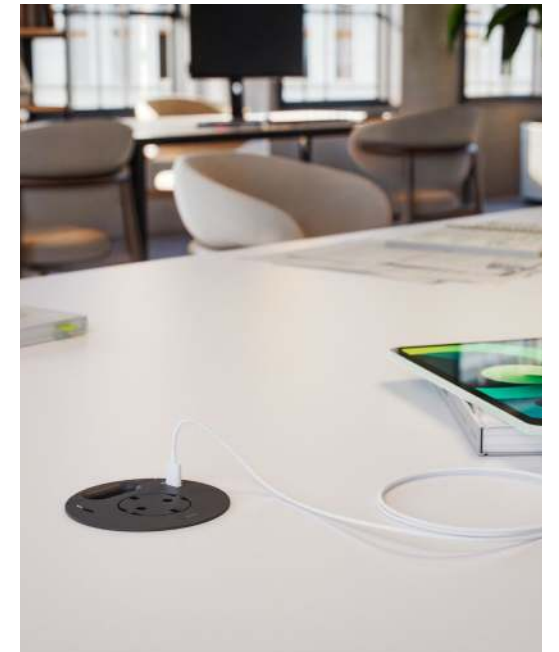

Power, voice, data and multimedia functions in a single enclosure with a variety of accessories for fastening it to the space provided in the furniture, via a tray, grille, etc.

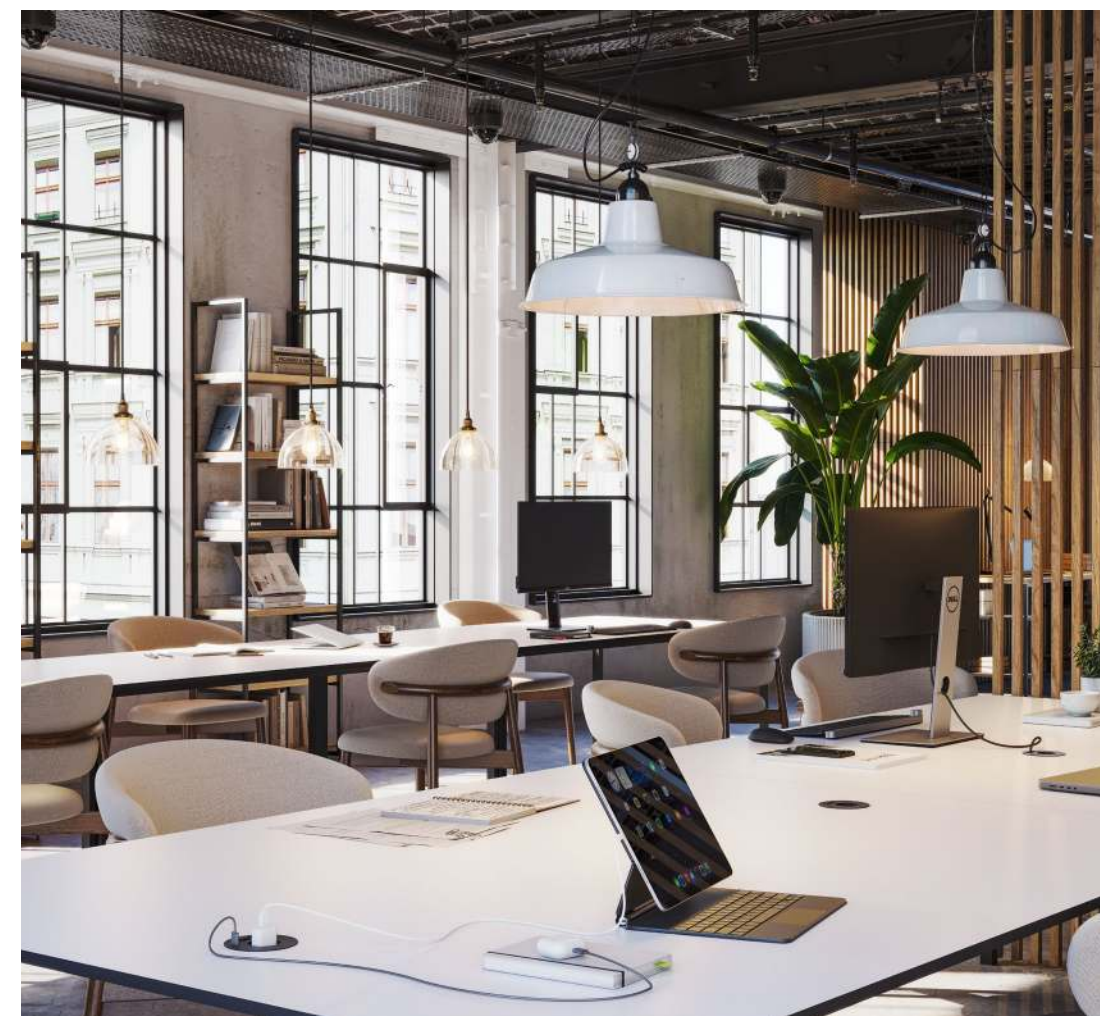

Simon K45 Ofiblock Compact with customisation of the functions required for each workstation, concealed in the furniture for more durable connections and to minimise the risk of unintentional disconnection.

UNDER THE FURNITURE

Simon 400 Flash 90 incorporates the connectivity necessary for both new open workspaces need (such as island, hot-desking or co-working) and conventional workstations, covering the main connectivity needs using the minimum space.

AUXILIARY FURNITURE

Simon Flash 30 offers various charging solutions and full connectivity via the USB Type-C Connector, to electrify all types of furniture and soft seating.

Simon Flash 60 integrates a wide variety of solutions, cable outlet, socket outlet, USB charging and integral connectivity in any kind of furniture.

CABLE OUTLET

Cable outlet for raised floor installations. It consists of two parts to customise the access position of the wiring and has a clip to adjust the wiring and prevent particles and small objects from falling on the floor slab.

CABLE MANAGER

Cable manager with four compartments and 91-cm long, to adapt to different heights of furniture. It has an oval shape and a size of 71 x 50 mm. The organiser has individual elements which can be removed one at a time. The base of the set is made of metal, for greater robustness.

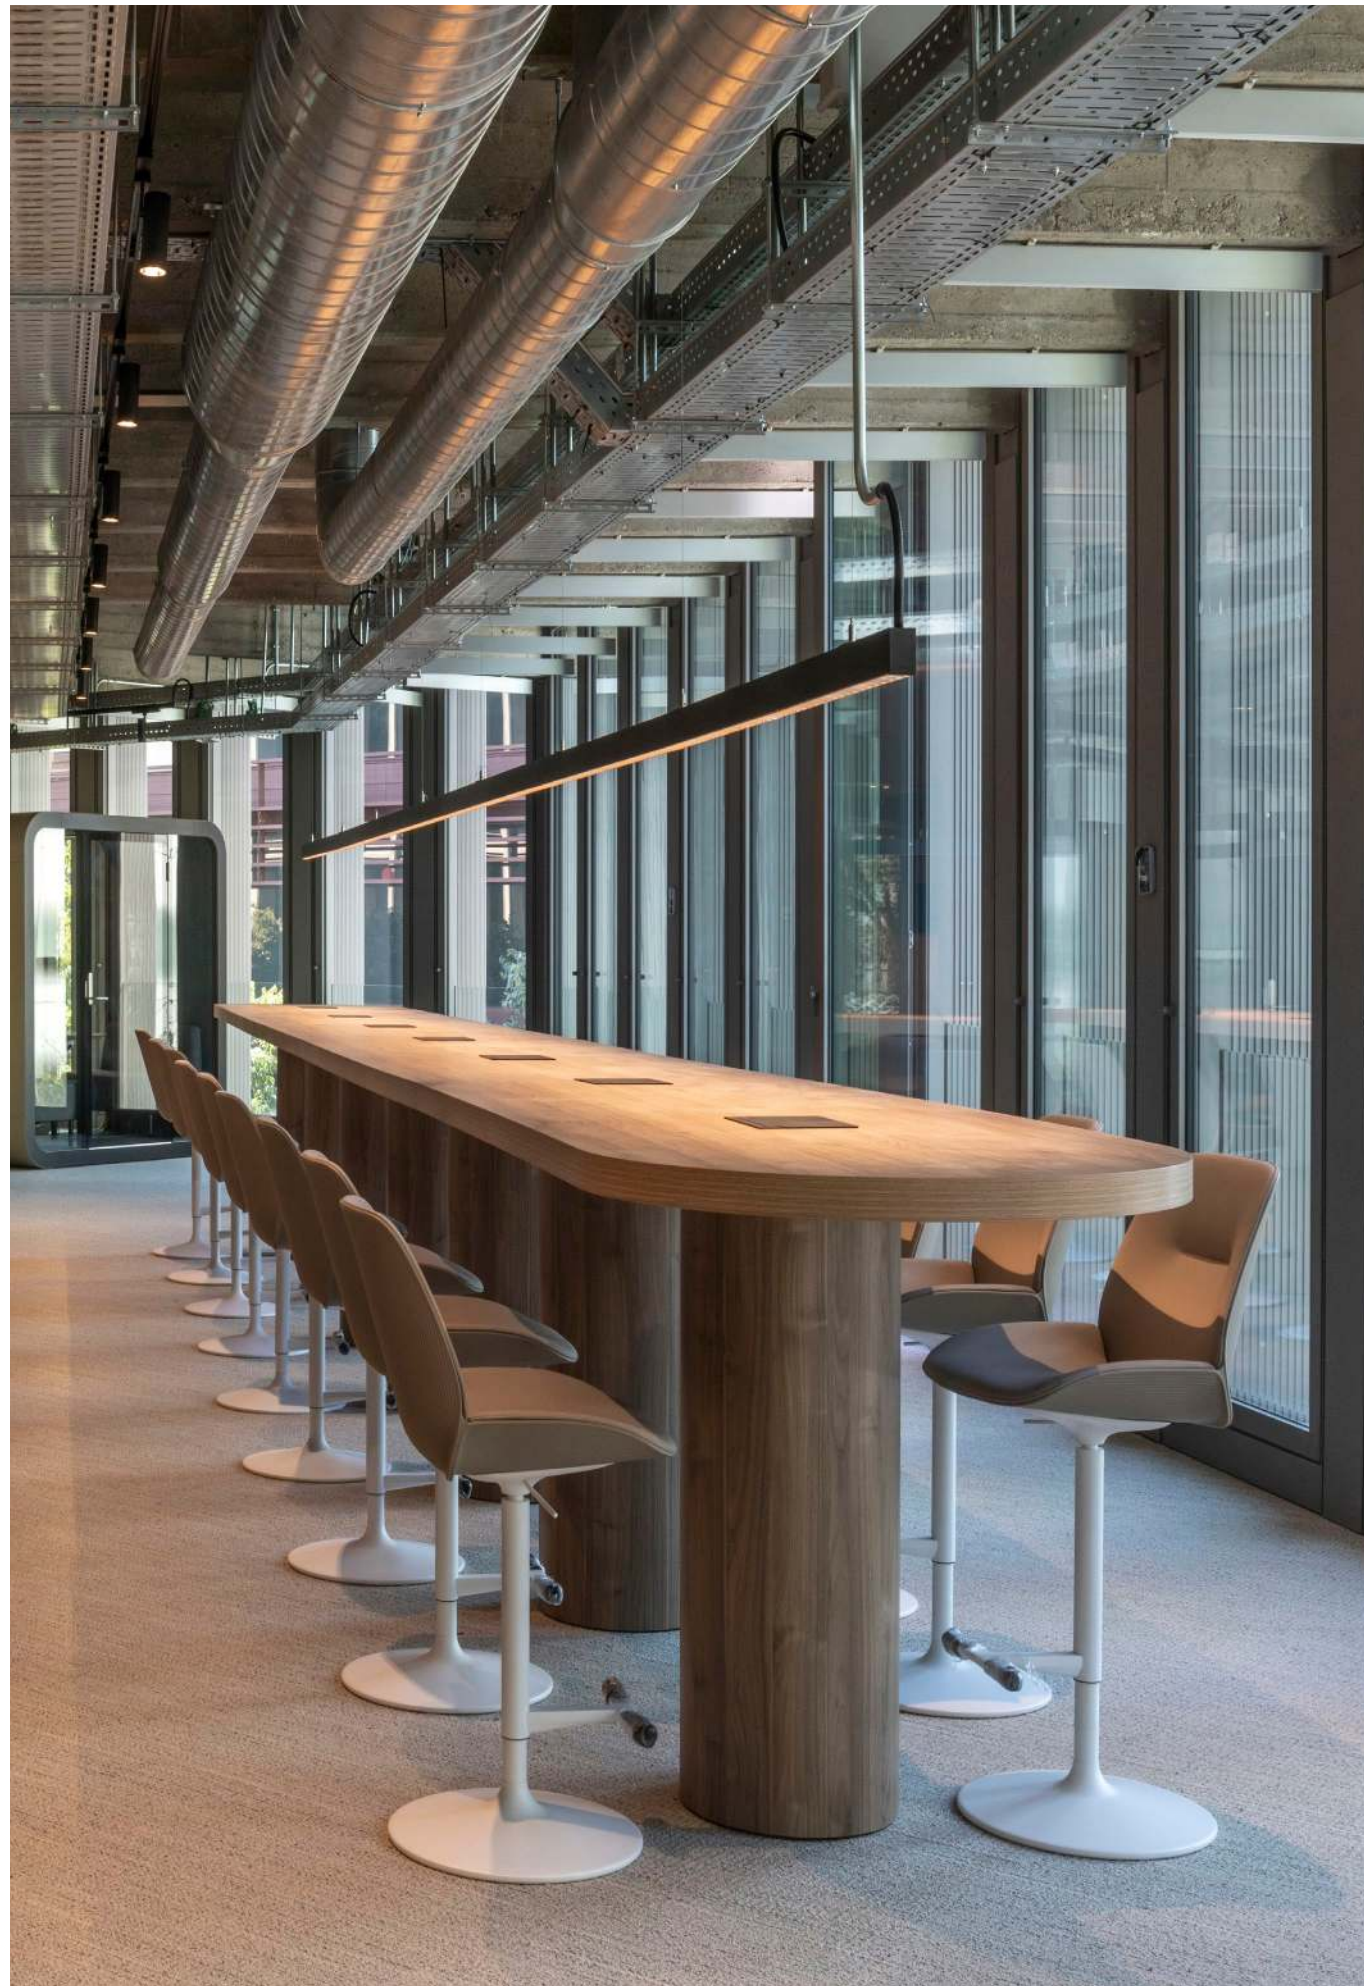

INSTALLATION ACCESSORIES

It organises and distributes all connections with the flexibility today's buildings require. Spaces that adapt to layout changes, extensions and functional reconfigurations.

Optimised installation without the need to strip cables or screw connectors. High security quick connectors.

TECHNICAL SPECIFICATIONS

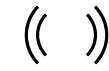

Smart charging

The models with USB charging include the **most common charging protocols (QuickCharge, PowerDelivery, etc.)** to communicate with the device being charged and reduce charge time. The range is available with **various charging intensities, offering up to 100 W.**

Anti-humidity

It incorporates a drainage system in the base, designed to remove any liquid that may have entered after an accidental drop, thereby preventing liquid accumulating inside and quickly restoring the device to full working order.

Charging without wiring

The range includes a model for charging your device wirelessly* without the need for a cable. Ideal for meeting rooms or areas where people convergence or with a large personnel flow, such as waiting rooms, etc.

* The device being charged must be compatible with this wireless charging system.

Advanced connectivity

The mini-dock acts as a universal USB-C hub, ensuring data transmission, charging, USB device connectivity and projection in a single connection.

Its integration allows different devices to be connected with no issues around compatibility or infrastructure changes.

COMPLETE KITS

Configured and wired kits with the most common configurations. Availability of versions incorporating a mini-dock, a compact device to **offer full connectivity** with no issues around compatibility or infrastructure changes, **concealed in the furniture.**

It acts as a universal USB-C hub, ensuring data transmission, charging, USB device connectivity and projection in a single connection.

TECHNICAL SPECIFICATIONS

Fast and error-free installation

Its circular shape — sized to be cut with standard diameter crowns — allows for rapid installation into the furniture.

It's compatible with the most common furniture thicknesses (between 10 and 50 mm) and is fastened via metal claws for **greater robustness and resilience**.

Anti-humidity

It incorporates a drainage system in the base, designed to remove any liquid that may have entered after an accidental drop, thereby preventing liquid accumulating inside and quickly restoring the device to full working order.

Durability

Furthermore, the structure of all the product's elements have been manufactured with **high-strength materials**, for a stronger, more durable and resistant fastening.

Minimalist aesthetics

Optional protective cover to conceal the connections when not in use.

Smart Charging and Connectivity

As the USB Type-C connector offers a range of functionalities, we offer the possibility of customising the quantity (one or two units) and type of product (USB charging or full connectivity), allowing you to choose different charging intensities (20 W, 100 W, etc.).

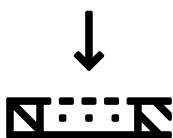

COMPLETE KITS

Configured and wired kits with the most common configurations. Availability of versions incorporating a mini-dock, a compact device to **offer full connectivity** with no issues around compatibility or infrastructure changes, **concealed in the furniture**.

It acts as a universal USB-C hub, ensuring data transmission, charging, USB device connectivity and projection in a single connection.

-  Cable outlet
-  Socket outlet
-  USB Charger A+C 18 W
-  USB-C 100 W Charger (65 + 30 W)
-  Mini-dock with 1 HDMI output and USB-C 20 W Charger

Simon 400 Flash 30

IN THE FURNITURE Simon Flash 30 offers various charging solutions and full connectivity via the USB Type-C Connector to electrify all types of furniture and soft seating.

FINISHES

ALL COLLECTIONS

TECHNICAL SPECIFICATIONS

Fast and error-free installation

The components are connected using a "male-female" system, ensuring fast, precise installation without tools or connection errors.

The product is delivered fully assembled and wired, with a 20 cm patch cord and a three-pole quick connector.

Energy efficient and multi-brand compatible

The mini-dock power system is compatible with most computers with USB-C charging, including Apple, Huawei, Lenovo, HP, Dell, Samsung, Acer and Asus, among others.

The power supply is supplied separately.

Single connector

USB Type-C charging up to 100 W and full connectivity (via a hidden mini-dock) via a single USB Type-C connector, for less visible wiring on the desk.

Minimalist aesthetics

Screw fastening with removable trim cover to adapt to the upholstery.

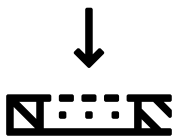

COMPLETE KITS

Configured and wired kits with the most common configurations. Availability of versions incorporating a mini-dock, a compact device to **offer full connectivity** with no issues around compatibility or infrastructure changes, **concealed in the furniture**.

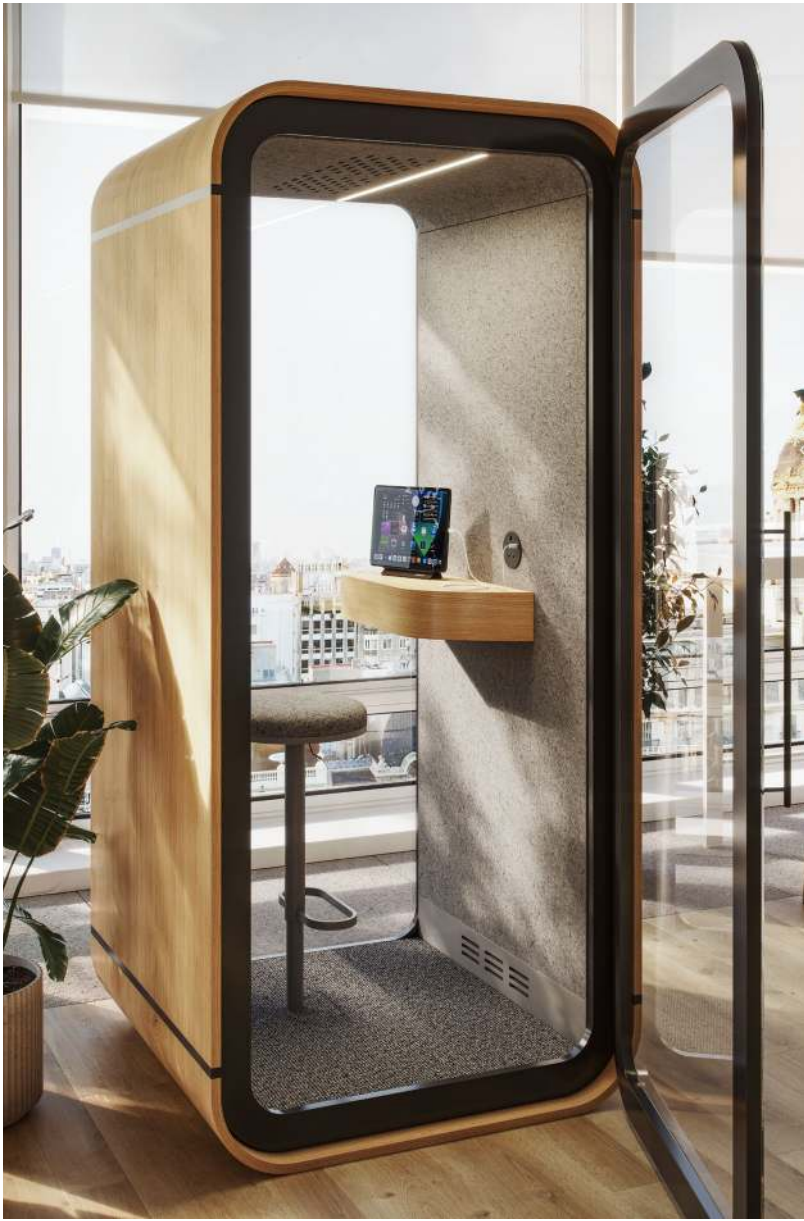

It acts as a universal USB-C hub, ensuring data transmission, charging, USB device connectivity and projection in a single connection.
